

A name you can trust

GRASS MOWERS

FOR VINEYARDS AND ORCHARDS

BERTI

A NAME YOU CAN TRUST

We are people who believe in our founders' dream of bringing agricultural and industrial machinery to all those in Italy and around the world who want to face the challenges of the job professionally.

Our mission is to produce durable, reliable and top quality equipment, minimising the risk of breakage.

Our priority is to offer solutions that make work easier and enable professionals to carry out their tasks efficiently and productively.

With our range of equipment and our commitment to customer service, we want to be the ideal partner for workers in all sectors and contribute to their daily success.

We are a Family that, with Collaboration and Trust, produces hundreds of pieces of equipment every day.

We have strong Ethics that require us to follow the highest quality standards and the Responsibility to provide every customer with the right equipment for their needs.

We look to the future with Confidence and Energy, to never stop being at your side in your daily work.

EUROSTAR

GRASS MOWER FOR VINEYARDS AND ORCHARDS

160-240 cm

60-120 HP

EUROSTAR is the new Berti high-performance grassmower designed for efficient cutting of grass between rows. This machine is specifically designed for those who have vineyards and orchards with uniform row widths.

RANGE OVERVIEW

EUROSTAR is built to promote comfort and versatility. It is characterized by a robust steel frame with a linear and attractive design. The transmission is entrusted to a pair of gearboxes arranged in line that guarantee a high rotation speed of the blades and a reduction in consumption. The greasing points have been reduced to facilitate rapid maintenance. The adjustment of the cutting height is entrusted to a pair of front wheels and a rear leveling roller.

TRACTOR COUPLING

REAR THREE-POINT LINKAGE
FIXED OR DISPLACEABLE

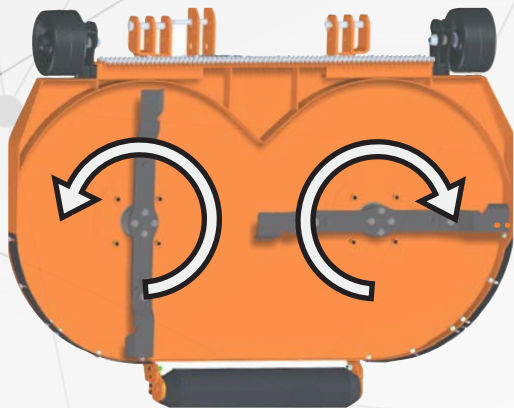

FIXED FRONT THREE-POINT LINKAGE

FRONT & REAR THREE-POINT LINKAGE
FIXED OR DISPLACEABLE

ARRANGEMENT AND ROTATION OF CUTTING BLADES

NEW HIGH VENTILATION KNIFE

EUROSTAR, THE DETAILS THAT MAKE THE DIFFERENCE

DOUBLE GEARBOX

The use of double gearbox allows the mower to reduce consumption and limits noise.

HIGH-POWER TOOTHED BELT DRIVE

PROTECTIONS WITH "EASYFIX" CHAINS

This type of front guard allows the replacement of a single faulty chain without having to dismantle all the others.

RUBBER FLEX COUPLING

Reduces torque peaks by protecting gearboxes

HEIGHT-ADJUSTABLE WHEELS WITH TELESCOPIC MOUNTING

Possibility of widening the wheel position by simply removing the support.

DOUBLE TIE ROD

It ensures better weight distribution during transport and manoeuvring.

WHEELS AND ROLLER

FRONT METAL-TYPE WHEELS (standard)

REAR ROLLER (standard)

FRONT RUBBER-TYPE WHEELS (optional)

REAR MOUNT RUBBER WHEELS (optional)

360° PIVOTING FRONT WHEELS (optional)

REAR MOUNT 360° PIVOTING FRONT WHEELS (optional)

B-FLEX

GRASS MOWER FOR VINEYARDS AND ORCHARDS

120-300 cm

60-120 HP

The B-FLEX grass mower is the excellent choice for the care and maintenance of vineyards and orchards, standing out for its versatility and ability to adapt to systems with variable row widths. Designed to ensure precise and effective grass cutting, B-FLEX is particularly suitable for those who need a flexible solution for plantings with non-uniform configurations.

RANGE OVERVIEW

B-Flex is characterized by a robust steel frame of innovative design, the transmission is entrusted to three gearboxes arranged in line, that guarantee maximum power transmission. The greasing points have been reduced to facilitate rapid maintenance, the cutting height adjustment is entrusted to a pair of front wheels and a rear leveling roller. The main frame is characterized by a self-cleaning system of the mowed material thanks to an inverted chassis' overlap.

FIXED FRONT & REAR THREE-POINT LINKAGE

ARRANGEMENT AND ROTATION OF CUTTING BLADES

NEW HIGH VENTILATION KNIFE

B-FLEX, THE DETAILS THAT MAKE THE DIFFERENCE

HEIGHT-ADJUSTABLE
WHEELS WITH TELESCOPIC
MOUNTING

Possibility of widening the wheel position
by simply removing the support.

PROTECTIONS WITH "EASYFIX"
CHAINS

This type of front guard allows the
replacement of a single faulty chain
without having to dismantle all the others.

CHROMED TUBES

The opening and closing of the frame is done on chrome-plated stems

INVERTED OVERLAP (CHASSIS)

The inverted overlap allows the frame to be cleaned of the mulched material that is usually placed on top of the frame.

DOUBLE TIE ROD

It ensures better weight distribution during transport and manoeuvring.

HEXAGONAL SHAFT

The use of the hexagonal shaft gives greater efficiency while ensuring maximum reliability.

ROUNDED SHAPE DESIGN

Rounded profiles ensure greater manoeuvrability when manoeuvring.

ADJUSTABLE WORKING WIDTH

The working width is conveniently variable by simple hydraulic control, thus providing maximum flexibility of use

WHEELS AND ROLLER

FRONT METAL-TYPE WHEELS (standard)

REAR ROLLER (standard)

FRONT RUBBER-TYPE WHEELS (optional)

REAR MOUNT RUBBER WHEELS (optional)

360° PIVOTING FRONT WHEELS (optional)

REAR MOUNT 360° PIVOTING FRONT WHEELS (optional)

AV

GRASS MOWER FOR VINEYARD, ORCHARDS AND PHOTOVOLTAIC SYSTEMS

180-375 cm

60-120 HP

The AV grass mower is the ideal solution for managing grass in vineyards, orchards with large foliage and photovoltaic systems. Thanks to its capability of wide side-reach, it allows the operator to work comfortably in the center of the row.

RANGE OVERVIEW

The innovative design of AV is enriched by a disc that allows delicate and targeted operations not only in vineyards and orchards, but also in photovoltaic installations. The retractable disc allows inter-row work. AV stands out for its ability to combine precision, comfort and flexibility, making it an indispensable tool for those looking for professional solutions for the maintenance of large green surfaces.

ARRANGEMENT AND ROTATION OF CUTTING BLADES

VENTILATION KNIFE

VENTILATION KNIFE

AV, THE DETAILS THAT MAKE THE DIFFERENCE

DISC WITH FREE ROTATION OF THE DECK,
HIGH RESISTANCE RUBBER PROTECTION
AND HYDRAULIC POSITIONING.

PROTECTIONS WITH "EASYFIX"
CHAINS

This type of front guard allows the replacement of a single faulty chain without having to dismantle all the others.

CHROMED TUBES

Lateral displacement takes place on chrome-plated tubes.

HEIGHT-ADJUSTABLE WHEELS WITH TELESCOPIC MOUNTING

Possibility of widening the wheel position
by simply removing the support.

RUBBER FLEX COUPLING

Reduces torque peaks

ELECTRO-HYDRAULIC FEELER

The AV electro-hydraulic feeler allows inter-row chopping on the row. This function allows complete processing with a single pass, optimizing times and reducing costs.

ELECTRO-HYDRAULIC FEELER

Sensitive, precise and fast.

VARIANT

GRASS MOWER FOR VINEYARDS AND ORCHARDS

160-400 cm

60-120 HP

The VARIANT grass mower is the ideal solution for mowing grass in vineyards and orchards with variable widths, thanks to its ability to adapt to systems of different sizes. Equipped with two independent adjustable discs on the sides, VARIANT is able to cover even the widest rows, ensuring a precise and uniform cut over the entire surface.

RANGE OVERVIEW

Variant is characterized by a sturdy steel frame with a linear and attractive design, the transmission is entrusted to a pair of gearboxes arranged in line that guarantee a high rotation of the blades and a reduction in consumption. The two hydraulically adjustable side discs allow the machine to easily adapt to different planting distances. The greasing points have been reduced to facilitate rapid maintenance, the cutting height adjustment is entrusted to a pair of front wheels and a rear leveling roller.

TRACTOR COUPLING

FIXED REAR THREE-POINT LINKAGE

ARRANGEMENT AND ROTATION OF CUTTING BLADES

NEW HIGH VENTILATION KNIFE

VENTILATION KNIFE

VARIANT, THE DETAILS THAT MAKE THE DIFFERENCE

PROTECTIONS WITH "EASYFIX" CHAINS

This type of front guard allows the replacement of a single faulty chain without having to dismantle all the others.

HEIGHT-ADJUSTABLE WHEELS WITH TELESCOPIC MOUNTING

Possibility of widening the wheel position
by simply removing the support.

PRIMARY TRANSMISSION

Consisting of gearbox and toothed belts

SECONDARY TRANSMISSION

High power belts

DOUBLE GEARBOX

The use of double gearbox allows the mower to reduce consumption and limits noise.

RUBBER FLEX COUPLING

Reduces torque peaks by protecting gearboxes

DOUBLE TIE ROD

It ensures better weight distribution during transport and manoeuvring.

HYDRAULICALLY OPENING DISCS

Available in different sizes:
60-70-80-90

ELECTRO-HYDRAULIC FEELERS

VARIANT electro-hydraulic feelers allow inter-row shredding on both rows simultaneously. This function allows complete processing in a single pass, optimizing times and reducing costs.

ELECTRO-HYDRAULIC FEELER

Sensitive, precise and fast.

INDEPENDENT OIL TANK

With the electro-hydraulic feeler option

WHEELS AND ROLLER

FRONT METAL-TYPE WHEELS (standard)

REAR ROLLER (standard)

FRONT RUBBER-TYPE WHEELS (standard)

ADDITIONAL APPLICATIONS

EUROSTAR - B-FLEX

WEEDER - SINGLE

WEEDER - DOUBLE

B-FLEX

ELECTRO-HYDRAULIC FEELER BOTH SIDES

Allows the machine to automatically adapt
to the width of the rows.
